

International-based Coding and Nurse Review Services

LexiCode now provides round-the-clock remote coding to support your evolving coding needs from two international locations:

Philippines

Clark Freeport Zone

India

Guindy, Chennai

We meet provider and payer needs via flexible access to consistent, secure, credentialed, and experienced international coding resources. Each coder has completed our unique training program and regularly participates in our Corporate Compliance Program. Coders are also required to participate in our daily, concurrent quality assurance program which reviews samples of each coder's work for consistency, accuracy, and confirmation that the coder meets our minimum 96% coding accuracy standard.

International Remote Center Operations

Philippines and India
